

YX024-PCS

Directional Indoor Base Unit Antenna (for YX500-PCS)

The YX024-PCS is an optional base unit antenna upgrade for the YX500-PCS which provides additional signal strength in interior spaces and is used to increase the area of improved cell coverage. The directional antenna replaces the omni-directional indoor antenna and connects to the base unit providing 7 dBi of gain. The antenna has a sleek design and small footprint for home and office environments. It features easy installation on walls and other surfaces.

YX024-PCS Front View

Benefits

- Easy installation
- Provides 7 dBi of gain
- Increase indoor signal strength for peak system performance
- Increase indoor coverage area
- May be mounted on wall or other surface
- Antenna may be mounted away from base unit for optimized coverage
